

What we do

JNL hires people who are customer service orientated, flexible and have a high level of creativity. They have the technology and expertise to solve logistics challenges and move products from origin to destination, door to door.

JNL works with large companies to family-owned and start-up businesses. We develop logistics plans and provide the people and execution to make the plans work.

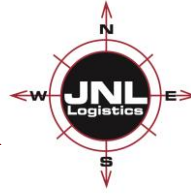

We manage relationships with carriers so our customers don't have to. Because we do not own equipment, we seek out the mode that provides the greatest efficiencies while meeting the customer's service needs.

We tackle the cycle of every load from start through finish. Our employee experts locate the best carrier for every load.

Our team members know the local carriers and rates. We communicate daily with carriers to identify the many pieces of available equipment and their locations. Our team uses this information, to match trucks with freight, to locate equipment even during peak seasons. Our team will help you obtain the best truck for your shipment at the most cost-effective price. If you require other modes or resources our experts are just a phone call away.

Once you tender the shipment to us, we take total responsibility. We dispatch the load, make sure carriers meet appointments, and monitor service. Carriers provide tracking information while in transit. We pay carriers, handle issues and resolve claims.

Add to this JNL's 95 years of combined service and experience in the transportation industry, and you can be assured that JNL Logistics will be Moving You Forward.

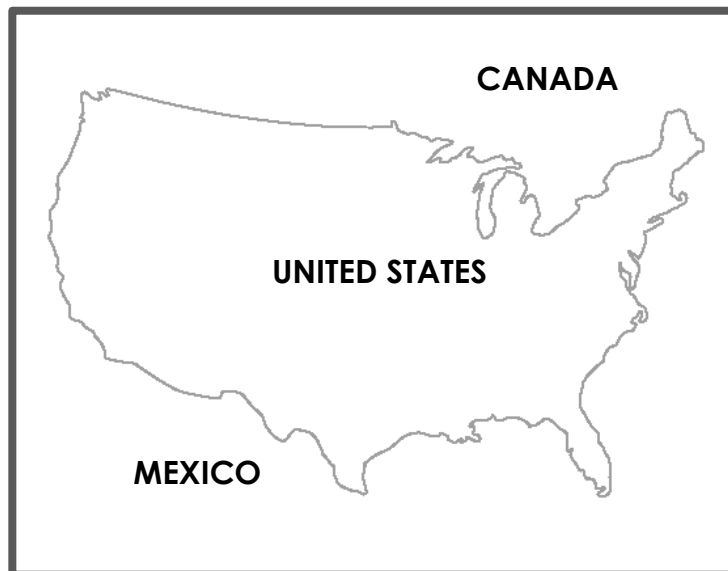

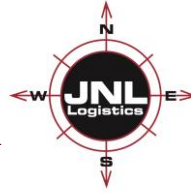

Contract Carrier Program

To become a contract carrier for JNL Logistics, carrier must meet all Minimum Safety Requirements & needs to present:

1. Copy of the carrier's Federal Operating Authority. This will be a certificate or permit for contract or common carrier authority showing the carrier's MC number and legal company name. If the carrier has re-entitled, JNL will need both the original and re-entitlement authorities.
2. Copy of current certificate. JNL will need a copy of the carrier's current insurance certificate with the following requirements:

Minimum \$100,000 cargo and \$1,000,000 auto & general liability coverage. The carrier's company name (must match the name on the Federal Operating Authority) and current address must also be on the certificate. JNL must be listed on the certificate as the "Certificate Holder".

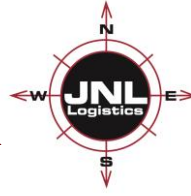

Flatbed, Specialized, and Cross-Border Transportation

It is sometimes difficult to locate specialized equipment for general commodity or dimensional permitted cargo. Through JNL, you can access a fleet of 4,700 specialized carriers with 103,925 units on your behalf and deliver your freight anywhere in the United States or Canada.

We source the equipment, provide door-to-door service, and can even provide expedited flatbed service. Freight bill payment and electronic ordering are available, and so is customs clearance. JNL gives you the capability to track and trace your freight from origin to destination.

In addition, we handle over-dimensional, overweight or oversized shipments. From planning to delivery, we coordinate every detail, including rate and service negotiations, in-transit clearances, permits, safety inspections and problem resolution

Transportation

JNL Logistics does not own equipment. Our non-asset based approach allows us to change with market conditions. That means our logistics managers are free to evaluate your requirements, including service and cost expectations, then suggest the best multimodal options to help you achieve your objectives. To find out how best we can serve your transportation needs, call Michael Kubes at 866-283-6700 or fax 630- 910-2978.

Since we don't rely on a single carrier, we have great flexibility when solving freight problems. JNL's industry expertise makes it possible to track trends and foresee when capacity will be a problem. At all times, we leverage our buying power in the equipment market on your behalf to source equipment

Claims Procedures

Carriers must immediately report all possible claims (shortage, damage, theft, etc.) to the JNL office. JNL claims procedures will be followed to resolve your claim. If you have any questions or concerns about how a claim is being handled please contact us.
